"The Cat Grabber"

Safe, humane method of removing the fractious patient from its cage while protecting your staff from injury.

- Inject through the mesh
- Return patient to carrier prior to discharge

The Scratch Shield™

Protects the veterinarian and technician from the fractious cat, dog, avian and exotic patient by immobilizing the animal against the back of the cage prior to injection.

The quickest and most humane means of controlling and sedating the patient safely while protecting you and the animal from unnecessary injury. The injection is made through the holes in the shield.

Cage cleaning and feeding is easier and safer with the unpredictable patient.

Fits: Shoreline®, Suburban®, and most standard cages (24" x 24" and 18" x 18")

- Unbreakable Lexan®
- 2-year warranty

Comfort Cot™ The Soft Rack

Eliminates:

- hard, uncomfortable surface
- loss of heat to s.s. cages
- urine puddle
- cleaning heavy racks

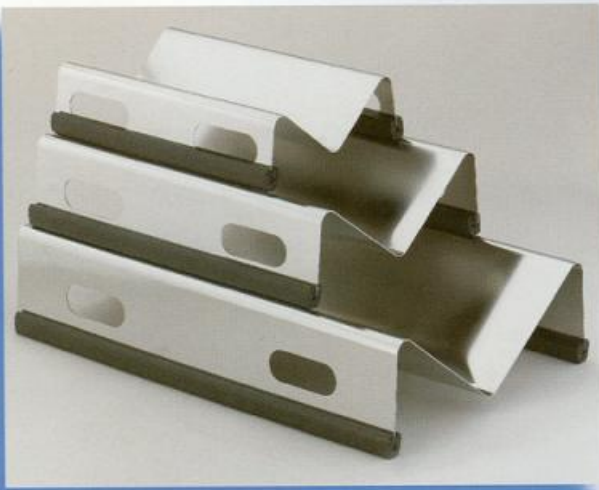

Fits standard size stainless steel cages

Size	Measure	Wt.
Small	21" x 26"	4
Medium	27" x 26"	6
Large	33" x 26"	8

- geriatrics
- anesthesia recovery
- critical care
- wound management
- groomers tub insert
- radiolucent mesh
- patient carrier

*Patent Pending

Thoracic Cradle

- Positive Patient Positioner
- Electropolished stainless steel construction
- Hand grips for easy transport of patient

Three sizes:	Small	10" x 14"
	Medium	12" x 18"
	Large	16" x 24"

HEAD'S UP™ Neck Brace/Restraint Multiple uses

Restricts movement of head and neck while allowing the dog or cat the freedom to eat, drink, run and sleep comfortably.

Provides protection from self-inflicted trauma, aggravating wound healing and removal of sutures.

Ventilated design eliminates discomfort from overheating under collar by allowing air circulation.

Can be used around limb for lick granuloma or around the abdomen to protect catheter, IV or change of bandage.

- Velcro® Fastener
- Eight sizes
- Safe and comfortable
- Easy to use and remove
- Manufacturing of high density polyethylene

Singlehanded Tourniquet™

- Tourniquet for blood draw or injections
- Leaves one hand free to manage patient while applying tourniquet
- Available in 5 vibrant colors
- Can be used as a convenient muzzle

Training Clicker™

- Single-handed aid for training
- Small and convenient
- Available in black with custom imprint

VetMax Stretcher

The VetMax™ Stretcher is designed to aid the veterinarian and staff in lifting and transporting the immobile patient from a vehicle and throughout the clinic or hospital while reducing the risk of stress and low back pain.

The shape of the frame allows for hand access under the stretcher thereby providing a means of gripping the stretcher without looking downward. Proper posture can transfer the weight to the legs so that the back is erect at the time of the lift, thus avoiding trauma.

The "hand access" feature allows the individual to grip the stretcher while holding ones back erect.

- Unique "3-D design" (48" x 24" x 3")
- Easy hand access under the stretcher for easy lifting
- Light weight at 4 lbs. supports 200 lbs.
- Velcro straps secure patient to stretcher

VetMax Stretcher and Cart

The VetMax Cart can best be described as a "wheelbarrow". It was designed to enable the veterinarian or technician to transport a patient whose weight exceeds the limits of their capacity without assistance. Singlehandedly load and transport up to 200 pounds, to surgical or x-ray tables.

Locking wheels

Size: 24" x 48"

Maxitherm® Heavy Duty Reusable Vinyl Circulator Pads

- Safe Heat Therapy
- Efficient Distribution of Heat
- Durable / Heavy Duty Flexible Material
- Cost Effective

The quick-couplings included on each Maxitherm allows for easy adaptation to the hose of the Gaymar T-Pump®, Baxter-Hamilton K Module® circulators.

Adapts to CSZ Micro-temp®

Small	12" x 18"
Medium	22" x 30"
Large	24" x 60"

Micro-Temp® digital model available

Hypothermia is a constant risk for the small veterinary surgical patient. Approximately 60 to 70% of surgery patients become hypothermic.

Various human medical studies have proven that maintaining warmth during and after surgery can markedly improve clinical outcomes.

The Micro-Temp system places a comfortable vinyl blanket under the patient. Warm water is circulated throughout this blanket by an electrical pump. The Micro-Temp pump maintains your selection of temperatures (86° - 107°) within 1.5°F.

- Audible alarm: low water, tilt, open sensor and high temperature
- Dual thermostats for safety
- 30 oz. water reservoir
- Self-sealing connectors, no water leakage
- Includes 9 feet of connecting hose
- 2-year warranty
